[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Career Objective

Motivated MERN Stack Developer seeking to build scalable and secure web applications. Aiming to strengthen full-stack expertise through real-world projects and modern practices, with the long-term goal of integrating AI into web development.

Skills

Frontend: JavaScript, TypeScript (Basic), [React.js](#), Next.js, HTML5, CSS3, Tailwind CSS, HeroUI

Backend: Node.js, [Express.js](#), REST APIs

Database & Tools: MongoDB, Git, GitHub, Stripe

Security and Authentication: BetterAuth, OAuth, JSON Web Token (JWT)

Soft Skills: Multilingual Communication, Working Under Pressure, Leadership, Analytical Thinking

Projects

ArtHub - An Online Art Marketplace [Live URL](#) | [Frontend Code](#) | [Backend Code](#)

Overview: ArtHub is a full-stack digital platform that connects art lovers, collectors, and buyers with talented artists, enabling them to discover and purchase original artworks seamlessly.

Main Features: Implemented a multi-role user system with separate dashboards and permissions for buyers, artists, and admins; built an advanced search, filter, and sort system for browsing artworks; and integrated Stripe for secure tier-based subscriptions and purchases with limit validations.

Drive Fleet - A Car Rental Platform [Live URL](#) | [Frontend Code](#) | [Backend Code](#)

Overview: A modern, responsive full-stack car rental platform where users can browse available cars, book rentals, manage their bookings, and add their own cars for rent.

Main Features: Implemented Better Auth for email/password and Google login, secured routes with JWT and HTTP-only cookies, and built a full car management and booking system.
